

PROVISIONAL ANSWER KEY

Question Paper Code:	129/2026/OL
Category Code:	314/2025
Exam:	Junior Instructor - Hospital House Keeping
Date of Test	16-07-2026
Department	Industrial Training

Question1:-

Consider the following statements regarding the risks associated with untreated wastewater from healthcare facilities:

- i. Wastewater from healthcare facilities may lead to the contamination of the municipal water system.
- ii. Untreated hospital wastewater can contaminate the surface water or ground water of the community.
- iii. Healthcare facility wastewater is naturally pure and requires no treatment before entering community water networks.

Which of the statements given above is/are correct ?

A:-Only i

B:-Only i and ii

C:-Only ii and iii

D:-All of the above i, ii and iii

Correct Answer:- Option-B

Question2:-According to the standard protocols for hospital cleanliness, which of the following areas is classified as a "high-touch surface" that requires more frequent cleaning and disinfection ?

A:-Floors and ceilings

B:-Administrative office desks

C:-

Doorknobs, bedrails and light switches

D:-External corridors and facility walls

Correct Answer:- Option-C

Question3:-

Which of the following statements is/are correct regarding the general principles of hand hygiene based on WHO guidelines ?

- i. Hand hygiene is recognized as the single most important measure for the prevention of infection
- ii. Studies show a direct correlation between an increase in adherence to hand hygiene and a decrease in healthcare-associated infections (HAIs)
- iii. The hands of Healthcare workers are considered the most common vehicle for the transmission of healthcare-associated pathogens.

A:-Only i

B:-Only i and iii

C:-Only ii and iii

D:-All of the above i, ii and iii

Correct Answer:- Option-D

Question4:-

Match the following :

I

- i. Cleaning
- ii. Disinfection
- iii. Sterilization
- iv. Decontamination
bacterial

II

- a. Destroys or eliminates all forms of microbial life
- b. Use of physical or chemical means to render an item safe for handling
- c. Removal of visible soil from objects and surfaces
- d. Eliminates many or all pathogenic microorganisms, except
spores

A:-i-c, ii-d, iii-b, iv-a

B:-i-c, ii-d, iii-a, iv-b

C:-i-a, ii-c, iii-d, iv-b

D:-i-b, ii-a, iii-c, iv-d

Correct Answer:- Option-B

Question5:-

Which of the following statements is/are false?

- I. Water treatment plants collect, treat and distribute water through a sequence that follows stages like coagulation, flocculation, sedimentation, filtration and disinfection.
- II. Reverse osmosis, distillation and filtration are methods employed by water purification systems to remove contaminants.
- III. Water purification methods are primarily designed to improve the health and taste of water, but they offer no direct benefits to the surrounding environment.

A:-Only III

B:-Only II

C:-Both I and II

D:-Both I and III

Correct Answer:- Option-A

Question6:-

Which among the following statements is not true regarding toilet maintenance ?

- i. The toilet cleaning process includes the bedpan support.
- ii. Both the toilet handle and the underside of the flush rim must be cleaned.
- iii. It is necessary to ensure sufficient contact time with the disinfectant when cleaning the toilet.
- iv. Staff should replenish paper towels and toilet paper before removing their dirty gloves.

A:-i and ii

B:-iv only

C:-iii only

D:-None of the above

Correct Answer:- Option-B

Question7:-

Which of the following statements is/are correct regarding the availability and location of a Spillage Kit in a hospital ?

- i. Spillage Kits should only be maintained and kept in the hospital's Central Sterile Supply Department (CSSD).
- ii. Spillage kits should be made available in all patient care areas of the hospital.
- iii. It is unnecessary to keep a Spillage Kit in areas where outpatients are treated.

A:-Only i

B:-Only ii

C:-Only i and iii

D:-All of the above i, ii and iii

Correct Answer:- Option-B

Question8:-What is the threshold level of dissolved calcium or magnesium below which water is considered "Soft water" ?

A:-30 ppm

B:-60 ppm

C:-90 ppm

D:-120 ppm

Correct Answer:- Option-B

Question9:-

Consider the following statements regarding the procurement of cleaning agents:

Statement I: Cleaning agents with a longer shelf life are usually bought in bulk to benefit from reduced costs due to economies of scale.

Statement II : All types of cleaning agents must always be bought in bulk regardless of their shelf life.

Which of the following options is correct ?

A:-Both Statement I and Statement II are correct

B:-Both Statement I and Statement II are incorrect

C:-Statement I is correct, but statement II is incorrect

D:-Statement I is incorrect, but Statement II is correct

Correct Answer:- Option-C

Question10:-

Consider the following statements regarding staff protective measures and hygiene during the OT cleaning process.

Statement I : Staff should wear OT dress, footwear and a cap and must clean hands before putting on gloves.

Statement II: Once a single pair of gloves is put on at the start, the same pair must be worn continuously without removal until all cleaning tasks are completely finished.

Which of the following options is correct ?

A:-Statement I is correct, but Statement II is incorrect

B:-Statement I is incorrect, but Statement II is correct

C:-Both Statement I and Statement II are correct

D:-Both Statement I and Statement II are incorrect

Correct Answer:- Option-A

Question11:-

Consider the following statements regarding the handling of different waste categories:

Statement I : To simplify the disposal process, general waste and bio-medical waste should be collected and mixed together in the same bins.

Statement II : Work instructions for proper waste segregation according to color codes must be prominently displayed in appropriate areas of the hospital.

Which of the following options is correct ?

A:-Statement I is correct, but Statement II is incorrect

B:-Statement I is incorrect, but Statement II is correct

C:-Both Statement I and Statement II are correct

D:-Both Statement I and Statement II are incorrect

Correct Answer:- Option-B

Question12:-Mercury is classified as a potent neurotoxin. Exposure to this heavy metal primarily harms which part of the human body ?

A:-The musculoskeletal framework

B:-The digestive tract and stomach lining exclusively

C:-The central and peripheral nervous system, including the brain and spinal cord

D:-The cardiovascular chambers and coronary arteries

Correct Answer:- Option-C

Question13:-

How should eye protection be put on in relation to the overall PPE removal process ?

A:-

It should be put on so that it can be taken off as early as possible

B:-It should be put on in a way that allows it to be taken off as late as possible

C:-It must be put on so that it cannot be removed until leaving the building

D:-It should be attached permanently to the outer gown layer

Correct Answer:- Option-B

Question14:-

Which of the following statements is/are correct regarding the equipment and handling methods used for transporting biomedical waste within a facility ?

- i. Trolleys or covered wheelbarrows should be used for the transportation of biomedical waste.
- ii. Manual loading of biomedical waste should be strictly avoided to ensure safety.
- iii. Open wheelbarrows are preferred over covered ones to maintain proper ventilation for the waste.

A:-Only i and iii

B:-Only i and ii

C:-Only ii and iii

D:-All of the above i, ii and iii

Correct Answer:- Option-B

Question15:-

Consider the following statements regarding the types of waste that belong to the White (Translucent) category.

- i. This category includes waste sharps including metals such as needles and syringes with fixed needles.
 - ii. It includes needles from needle tip cutters or burners, scalpels, blades or any other contaminated sharp object that may cause punctures and cuts.
 - iii. This category encompasses both used, discarded and contaminated metal sharps.
- Which of the statements given above is/are correct ?

A:-Only i and ii

B:-
Only ii and iii

C:-Only i and iii

D:-All of the above i, ii and iii

Correct Answer:- Option-D

Question16:-

Match the following.

- | I | II |
|---------------------|---|
| i. Yellow Category | a. Waste Sharps including metals |
| ii. Red Category | b. Glassware and Metallic body implants |
| iii. White Category | c. Human anatomical and soiled waste |
| iv. Blue Category | d. Contaminated Waste (Recyclable) |

A:-i-c, ii-d, iii-b, iv-a

B:-i-c, ii-d, iii-a, iv-b

C:-i-d, ii-c, iii-a, iv-b

D:-i-a, ii-d, iii-c, iv-b

Correct Answer:- Option-B

Question17:-

Consider the following statements regarding the permissible limits for storing biomedical waste in smaller healthcare setups like nursing homes.

- i. The maximum duration of waste storage should not exceed 8-10 hours in nursing homes.
- ii. The duration of storage should not exceed 24 hours in nursing homes.
- iii. Nursing homes have stricter storage hour limits than large hospitals with over 250 beds.

Which of the statements given above is/are correct ?

A:-Only i

B:-Only ii

C:-Only ii and iii

D:-All of the above i, ii and iii

Correct Answer:- Option-B

Question18:-

Which of the following statements correctly identifies the evaluation protocol for the immunization status of the facility staff ?

- i. Evaluation of the immunization status of the staff must be included in the annual health check-up.
- ii. Staff immunization records should only be evaluated once at the time of initial recruitment and never checked again.
- iii. Immunization tracking is entirely optional during a staff member's routine yearly health evaluation.

A:-Only i

B:-Only ii

C:-Only i and iii

D:-Only ii and iii

Correct Answer:- Option-A

Question19:-

Consider the following statements regarding the technical specifications for digging and filling a deep burial pit.

- i. A pit or trench should be dug about two meters deep and needs to be half filled with waste.
- ii. The waste must be covered with lime within 50 cm of the surface, before filling the rest of the pit with soil.
- iii. On each occasion when wastes are added to the pit, a layer of 50 cm of soil shall be added to cover the wastes.

Which of the statements given above is/are correct ?

A:-Only i

B:-Only i and ii

C:-Only ii and iii

D:-All of the above i, ii and iii

Correct Answer:- Option-B

Question20:-

Which of the following statements is/are correct concerning the tracking of staff health and waste pre-treatment records for SPCB verification ?

- i. Records of pre-treatment of specified waste categories must be included.
- ii. The facility must enclose both health status records and immunization records of the Health Care Workers involved in handling biomedical waste.
- iii. In centers where a captive treatment facility is allowed by the SPCB, the record of recyclable waste handed over to an authorized recycler must be logged in kg/annum.

A:-Only i and ii

B:-Only ii and iii

C:-Only i and iii

D:-All of the above i, ii and iii

Correct Answer:- Option-D

Question21:-Which fire extinguisher should not be used on energized electrical equipment ?

A:-CO₂ extinguisher

B:-Dry chemical powder extinguisher

C:-Water extinguisher

D:-Clean agent extinguisher

Correct Answer:- Option-C

Question22:-A fire in an MRI room containing energized electrical equipment should initially be controlled using

A:-Water jet extinguisher

B:-Foam extinguisher

C:-CO₂ extinguisher

D:-Sand only

Correct Answer:- Option-C

Question23:-

In hospital fire safety management, the most vulnerable group during evacuation is

A:-Administrative staff

B:-Visitors

C:-Ambulatory patients

D:-Critically ill and bedridden patients

Correct Answer:- Option-D

Question24:-Which method extinguishes fire by reducing its temperature?

A:-Starvation

B:-Cooling

C:-Smothering

D:-Isolation

Correct Answer:- Option-B

Question25:-

Which method extinguishes fire by cutting off the oxygen supply ?

A:-Cooling

B:-Starvation

C:-Smothering

D:-Ventilation

Correct Answer:- Option-C

Question26:-The first step when discovering a fire in a hospital is to

A:-Hide from the fire

B:-Raise the alarm

C:-Open all windows

D:-Run away immediately

Correct Answer:- Option-B

Question27:-

Which extinguisher works mainly by smothering the fire and displacing oxygen?

A:-Water extinguisher

B:-CO₂ extinguisher

C:-Foam extinguisher

D:-

Sand bucket

Correct Answer:- Option-B

Question28:-Which hospital area has a relatively higher risk of fire due to the presence of oxygen and electrical equipment ?

A:-Medical records department

B:-Intensive Care Unit (ICU)

C:-Reception area

D:-Cafeteria

Correct Answer:- Option-B

Question29:-A fire involving magnesium or sodium requires

A:-Water extinguisher

B:-Foam extinguisher

C:-Class D extinguisher

D:-CO₂ extinguisher

Correct Answer:- Option-C

Question30:-A dry chemical powder extinguisher extinguishes fire mainly by

A:-Cooling the fuel surface

B:-Interrupting the combustion chain reaction

C:-Increasing humidity

D:-Removing smoke

Correct Answer:- Option-B

Question31:-Which disease can be transmitted through contact with infected animal saliva ?

A:-Rabies

B:-Dengue

C:-Cholera

D:-Malaria

Correct Answer:- Option-A

Question32:-Which rodent characteristic makes eradication difficult ?

A:-Slow reproduction

B:-Poor adaptability

C:-Rapid breeding and adaptability

D:-Dependence on humans for movement

Correct Answer:- Option-C

Question33:-Which of the following is a biological method of pest control ?

A:-Trapping rodents

B:-Using natural predators

C:-Fumigation

D:-Rodent-proof construction

Correct Answer:- Option-B

Question34:-Which pest is most associated with asthma and allergic reactions indoors ?

A:-Cockroach

B:-Rat

C:-Lizard

D:-Sparrow

Correct Answer:- Option-A

Question35:-The primary objective of pest surveillance in hospitals is to

A:-Increase pesticide use

B:-Detect infestations early and prevent outbreaks

C:-Improve hospital aesthetics only

D:-Reduce staff workload

Correct Answer:- Option-B

Question36:-

Which disease can be transmitted through rat urine contaminating water ?

A:-Tuberculosis

B:-Leptospirosis

C:-Malaria

D:-Chickenpox

Correct Answer:- Option-B

Question37:-Integrated Pest Management (IPM) emphasizes

A:-Exclusive use of pesticides

B:-Combination of preventive, biological and chemical measures

C:-Rodent trapping only

D:-Animal relocation only

Correct Answer:- Option-B

Question38:-Which disease is primarily associated with rat flea infestation?

A:-Plague

B:-Typhoid

C:-Hepatitis B

D:-Cholera

Correct Answer:- Option-A

Question39:-In Integrated Pest Management, chemical control should

A:-Be the first and only option

B:-Never be used

C:-Be used judiciously when necessary

D:-

Replace sanitation measures

Correct Answer:- Option-C

Question40:-The term "rodent proofing" refers to

A:-Vaccinating rodents

B:-Preventing rodent entry into buildings

C:-Feeding rodents safely

D:-Keeping rodents in cages

Correct Answer:- Option-B

Question41:-What is the general level of lighting in hospital general ward ?

A:-150 lux

B:-100 lux

C:-250 lux

D:-150-300 lux

Correct Answer:- Option-B

Question42:-

Which color is commonly used in hospital to signage ?

A:-Red

B:-White

C:-Green

D:-Yellow

Correct Answer:- Option-C

Question43:-Which flooring material is commonly used in Hospital ?

A:-Wood

B:-Cement

C:-Vinyl

D:-Carpet

Correct Answer:- Option-C

Question44:-Which color is often associate with cleanliness in hospital ?

A:-Yellow

B:-Red

C:-Purple

D:-White

Correct Answer:- Option-D

Question45:-Indoor plants in hospital help to improve

A:-Noise

B:-Pollution

C:-Cost

D:-Ambience

Correct Answer:- Option-D

Question46:-Curtains used in hospitals should be

A:-Colorful

B:-Transparent

C:-Dark

D:-Fire-resistant

Correct Answer:- Option-D

Question47:-

Indoor plants should be free from

A:-Flowers

B:-Pests

C:-Soil

D:-Fruits

Correct Answer:- Option-B

Question48:-Which color is used to signify the radiation hazards ?

A:-Red on white

B:-Yellow on black

C:-Purple on yellow

D:-White on blue

Correct Answer:- Option-C

Question49:-What is the recommended features of hospital furniture ?

A:-Difficult to clean

B:-Sharp edges

C:-Easy to clean and durable

D:-Heavy and immovable

Correct Answer:- Option-C

Question50:-

The primary purpose of indoor plants in hospital is

A:-Decoration

B:-Air quality

C:-Patient well being

D:-All of these

Correct Answer:- Option-D

Question51:-What are the primary purpose of hospital laundry services ?

A:-Food preparation

B:-Linen cleaning and disinfection

C:-Waste disposal

D:-Purchase of hospital linen

Correct Answer:- Option-B

Question52:-What should laundry staff always wear while handling soiled linen ?

A:-

Reusable rubber gloves

B:-Disposable gloves

C:-Cap

D:-Gum boots

Correct Answer:- Option-A

Question53:-

The processes removing stain from linen is called

A:-Folding

B:-Sorting

C:-Spotting

D:-Packing

Correct Answer:- Option-C

Question54:-

Linen is disinfected mainly during

A:-Sorting

B:-Washing

C:-Folding

D:-Collecting

Correct Answer:- Option-B

Question55:-Torn linen should be send for

A:-Disposal

B:-Repair

C:-Washing

D:-Storage

Correct Answer:- Option-B

Question56:-

The counting of linen before washing is called

A:-Inventory

B:-Audit

C:-Inspection

D:-Tagging

Correct Answer:- Option-A

Question57:-Clean linen should be transported in

A:-Open trolley

B:-Covered trolley

C:-Basket

D:-Sack

Correct Answer:- Option-B

Question58:-The machine used to remove water from linen is known as

A:-Washer

B:-Drier

C:-Extractor

D:-Ironer

Correct Answer:- Option-C

Question59:-Which linen is considered contaminated?

A:-Unused linen

B:-Torn linen

C:-Linen stained with blood and body fluid

D:-New linen

Correct Answer:- Option-C

Question60:-Which processes kills most microorganisms in linen ?

A:-Folding

B:-Sorting

C:-Disinfection

D:-Packing

Correct Answer:- Option-C

Question61:-The term Scissor-action in mop sweepers refers to the

A:-Cleaning Pattern of the mop

B:-Method of storing the mop

C:-Double-hinged frame mechanism

D:-Shape of the mop handle

Correct Answer:- Option-C

Question62:-Chamois leather is commonly used to clean

A:-Carpet

B:-
Concrete floor

C:-Mirrors and Window

D:-Kitchen Stove

Correct Answer:- Option-C

Question63:-What is the main purpose of preventive maintenance ?

A:-
To repair damaged equipment

B:-To prevent unscheduled downtime and equipment damage

C:-
To replace all equipment regularly

D:-
To increase Production cost

Correct Answer:- Option-B

Question64:-Which of the following is not a consideration when choosing equipment ?

A:-
Ease of maintenance

B:-Multiple usage

C:-
Portable and easy to store

D:-Attractive Packing

Correct Answer:- Option-D

Question65:-
Red pads in a floor scrubber are primarily used for

A:-Scrubbing

B:-Polishing

C:-Buffing and cleaning

D:-Scarifying

Correct Answer:- Option-C

Question66:-A housekeeping supervisor notice that a floor scrubber is difficult to move and produces unusual sound during operation. What should be done first ?

A:-Increasing the operating speed

B:-Oil the wheels/Casters for easy movement

C:-

Replace the floor pad

D:-Continue using it until its sot working

Correct Answer:- Option-B

Question67:-Soft brushes are characterized by

A:-Stiff and spaced-out bristles

B:-Short coarse bristles

C:-Flexible and close-set bristles

D:-Metal bristles

Correct Answer:- Option-C

Question68:-

Why are dusters generally colour coded ?

A:-To make them attractive

B:-For effective and correct use in specific areas

C:-To increase durability

D:-To reduce cost

Correct Answer:- Option-B

Question69:-A room attendant reports lower back discomfort due to frequent bending while collecting debris. Which equipment modification would most effectively address this issue ?

A:-Using a larger dustpan

B:-Using a dustpan with a long attachment

C:-

Replacing the hand caddy

D:-Using additional spray bottles

Correct Answer:- Option-B

Question70:-Which housekeeping item is specifically valued for being lint free while maintain high absorbency ?

A:-Dust sheet

B:-Swabs and wipes

C:-Scrims

D:-Carts and Trolleys

Correct Answer:- Option-C

Question71:-Airflow characterized by irregular and chaotic movement is called

A:-Laminar airflow

B:-Transitional airflow

C:-Turbulent airflow

D:-Liner airflow

Correct Answer:- Option-C

Question72:-What is the primary objective of carbon sequestration ?

A:-

Increasing atmospheric Carbon dioxide

B:-Reducing atmospheric Carbon dioxide

C:-Producing fossil fuels

D:-Enhancing ozone formation

Correct Answer:- Option-B

Question73:-In Venturi scrubber the narrowest section where gas velocity is maximum called the

A:-Diffuser

B:-Separator

C:-Collector

D:-Throat

Correct Answer:- Option-D

Question74:-

The following statements are correct about air except

A:-Air occupies space

B:-Air has weight due to its mass

C:-Air cannot be compressed

D:-Air exerts force on objects

Correct Answer:- Option-C

Question75:-Which are the two basic factors that determine the concentration of Humidity in the atmosphere ?

A:-Wind and rainfall

B:-Temperature and Pressure

C:-
Altitude and Sunlight

D:-Clouds and Precipitation

Correct Answer:- Option-B

Question76:-In hospital administrator plans to relocate the pharmacy closer to the emergency department while maintaining proper zoning principles. In which zone should the pharmacy be located ?

A:-Outer Zone

B:-Second Zone

C:-Inner Zone

D:-Deep Zone

Correct Answer:- Option-B

Question77:-

Cases of Legionnaires disease in hospitals are most commonly linked to

A:-Food contamination

B:-Air pollution

C:-Soil erosion

D:-Water pollution

Correct Answer:- Option-D

Question78:-Why is decibel scale logarithmic ?

A:-To measure the intensity of sound

B:-To calculate air velocity

C:-To measure humidity

D:-

To measure temperature changes

Correct Answer:- Option-A

Question79:-What does BOD stand for

A:-Biological Oxygen Deficit

B:-Biochemical Oxygen Demand

C:-Biological Oxidation Demand

D:-

Biochemical Oxidation Deficit

Correct Answer:- Option-B

Question80:-

Sulphur dioxide contributes the formation of

A:-Photochemical smog

B:-Acid rain

C:-Ozone Layer

D:-Greenhouse gases

Correct Answer:- Option-B

Question81:-Hospital Acquired Infection (HAI) is also known as

A:-Endemic infection

B:-Nosocomial infection

C:-Opportunistic infection

D:-Community infection

Correct Answer:- Option-B

Question82:-Which method is considered the most reliable for sterilization of surgical instruments ?

A:-Boiling

B:-Autoclaving

C:-Fumigation

D:-Washing with soap

Correct Answer:- Option-B

Question83:-The single most effective method to prevent hospital infection is

A:-Fumigation

B:-Hand hygiene

C:-Air conditioning

D:-Surgery

Correct Answer:- Option-B

Question84:-The committee responsible for monitoring infection prevention in hospitals

A:-Purchase committee

B:-Hospital infection control committee

C:-Ethics committee

D:-Finance committee

Correct Answer:- Option-B

Question85:-

Which sterilization method is most suitable for dressing and linen ?

A:-Auto claving

B:-Dry sweeping

C:-Hand washing

D:-Mopping

Correct Answer:- Option-A

Question86:-Which of the following is an example of Healthcare Associated Infection (HAI) ?

A:-Common cold acquired at home

B:-Surgical site infection occurring after surgery in a hospital

C:-Malaria from mosquito bite outside hospital

D:-Food poisoning at a restaurant

Correct Answer:- Option-B

Question87:-Hand washing should be performed

A:-Before patient contact only

B:-After patient contact only

C:-Before and after patient contact

D:-Once per shift

Correct Answer:- Option-C

Question88:-The purpose of aseptic procedure is to

A:-Increase patient exposure to microbes

B:-Prevent contamination during procedures

C:-Reduce ventilation

D:-Increase humidity

Correct Answer:- Option-B

Question89:-Sterilization destroys

A:-Bacteria only

B:-Viruses only

C:-All forms of microbial life including spores

D:-Fungi only

Correct Answer:- Option-C

Question90:-The standard temperature commonly used in autoclaving is

A:-100 °C

B:-110 °C

C:-121 °C

D:-150 °C

Correct Answer:- Option-C

Question91:-

Which is the first function of management ?

A:-Organizing

B:-Staffing

C:-Planning

D:-Controlling

Correct Answer:- Option-C

Question92:-The housekeeping control desk is mainly responsible for

A:-Medical treatment

B:-Laboratory testing

C:-Coordination and communication of housekeeping activities

D:-Security service only

Correct Answer:- Option-C

Question93:-The full form of CPU is

A:-Central Processing Unit

B:-Computer Power Unit

C:-Central Program Utility

D:-Control Processing Unit

Correct Answer:- Option-A

Question94:-Which software is commonly used for spread sheets ?

A:-MS Word

B:-MS Excel

C:-MS Paint

D:-Notepad

Correct Answer:- Option-B

Question95:-Effective housekeeping management requires

A:-Coordination

B:-Supervision

C:-Record maintenance

D:-All of the above

Correct Answer:- Option-D

Question96:-Which documents helps monitor staff attendance ?

A:-Inventory register

B:-Attendance register

C:-Complaint book

D:-Purchase order

Correct Answer:- Option-B

Question97:-Which is used to create presentation ?

A:-MS Word

B:-MS Power Point

C:-MS Spread Sheet

D:-MS Excel

Correct Answer:- Option-B

Question98:-What is the default animation start option ?

A:-With previous

B:-After previous

C:-On click

D:-Automatically

Correct Answer:- Option-C

Question99:-Which tab is primarily used to add animation effect to objects ?

A:-Home

B:-Insert

C:-Animations

D:-Slide Show

Correct Answer:- Option-C

Question100:-Which is not an animation type ?

A:-Entrance

B:-Exit

C:-Transition

D:-Emphasis

Correct Answer:- Option-C
