DETAILED SYLLABUS FOR THE POST OF AC PLANT OPERATOR IN KERALA STATE FILM DEVELOPMENT CORPORATION LTD.

(CATEGORY NO: 255/2023)

(TOTAL MARKS ±100)

MODULES	SUB- HEADINGS	TOPICS	
		Safety precautions	2
		First Aids	
	Safety	Personal Protective Equipments (PPE)	
		Fire fittings equipments	
		Electrical safety	
		Different types of fitting hand tools, power tools	
		Functions, constructions, specifications & application of hand tools and power tools	3
	Fitting	Care and maintenance of hand tool & power tools Machineries and equipments like drilling machines, grinding machines etc	
Module-1	riceing	Function, construction, specification, application, care & maintenance of machineries & equipments	
Fitting, Sheet metal & Welding		Precision measuring instruments like verniercalliper, micrometers, vernier height gauge etc	
		Functions, constructions, specifications & application of precision instruments	
		Care and maintenance of precision instruments	
		Sheet metal tools, instruments, equipments	
	Sheet metal	Construction, working, use, application and specification	2
	Silect Metal	Care and maintenance of sheet metal tools, instruments& equipments	
		Types of sheet metal joints	
		Rivets & riveting, their types and uses	
		Welding tools and equipments, types specifications and use	2
		Oxy-Acetylene welding equipments & accessories	
		Gas welding hand tools and safety apparels	
	Welding	Arc welding accessories	
		Classification of welding process	
		Methods of gas welding	

		Use of Oxy Acetylene, Oxy LPG, Air LPG and two stage regulator	
		Types of weld	
		Electrical terms such as AC and DC supply, voltage, current, capacitors, resistors, power, energy, frequency etc Conductors and insulators	
	Electrical	Series circuits, parallel circuits, open circuits, short circuits	3
	Licetrical	Material used as conductors	5
		Joints in conductors	
		Measuring instruments such as voltmeter, ammeter, ohmmeter, energy	
		meter, frequency meter etc	
		Earthing and its importance	
Module-2		Earth resistance, insulation, and continuity testing	
Electrical		Single phase and three phase motors Construction and working principle of Capacitor start Capacitor run induction motor (CSR), Split phase induction motor (RSIR), Capacitor start induction motor (CSIR), Permanent Capacitor or	
	AC Motors	capacitor run induction motor (PSC), Resistance start capacitor run induction motor (RSCR), Shaded pole motor etc Centrifugal switch	3
		Methods of changing the direction of rotation	
		Construction and working principle of squirrel cage induction motor, slip ring induction motor	
		Common faults, causes and remedies in single phase and three phase motors	
	Motor starters	Construction and working of Single phase and three phase motor starters such as DOL starter, Star delta starter, Auto transformer starter, Rotor resistance starter	2
		Common faults, causes and remedies in single phase and three phase motor starters	
		Active and passive components	
Module-3	Electronic	Resistor, Capacitors, Semiconductors, Diodes, Transistors etc	_
Electronics	components	Rectifiers (Half wave, Full wave, Bridge rectifier etc)	2
		Zener diodes, voltage regulator, Amplification	
		Transistors-CB,CE,CC Configuration	
		Photo diodes, Photo transistors, Multi vibrator, SCRs, UJTs, ICs etc	
		Refrigeration tools, instruments, and equipments	

	Refrigeration tools, instruments ,and equipments	Construction, working, use, application and specification Care and maintenance of refrigeration tools, instruments& equipments Fundamentals of refrigeration	4
Module-4	Fundamentals of refrigeration	Science related to refrigeration such as units, mass, weight, work, power, energy, force, pressure, heat, temperature, sensible heat, latent heat, super heating, sub cooling, saturation temperature, boiling point, freezing point, etc Laws of thermodynamic, Laws of perfect gases	5
Basic refrigeration		Construction and working of ice refrigeration Construction and working of Dry ice refrigeration Construction and working of Water vapour refrigeration Construction and working of Liquid gas refrigeration Construction and working of Evaporative	
	Different types of refrigeration system	refrigeration Construction and working of Steam jet refrigeration Construction and working of Thermo electronic refrigeration Construction and working of Vapour absorption refrigeration cycle	3
		Construction and working of Vapour compression cycle, fundamental operations, Sub cooling and super heating Application of vapour compression cycle COP, Ton of Refrigeration Study of Ph, Ts, Pv diagram	
	Compressor	Construction, working, types and application of different compressors such as Reciprocating, Rotary, Scroll, Screw, Centrifugal, Swash plate etc Volumetric efficiency, capacity control, factors influencing volumetric efficiency, piston displacement, compression ratio etc Compressor lubrication oil, properties, types and lubrication methods	5
		oil separator Advantage and disadvantage of different types of compressors Common faults, care and remedies in compressor Construction, working, types and application of condensers such as air cooled, Water cooled, evaporative Capacity of condensers, factors affecting the	

		condenser capacity	
	Condenser	Advantage and disadvantage of different types of	3
		condensers	
		De-scaling, methods of descaling, fouling factor	
		etc	
Module-5 Refrigeration		Liquid receiver	
equipments		Drier, types and application	
equipments		Description of desiccants	
		Construction and working principles of different	
		types of cooling towers	
		Types of cooling towers	
	Cooling tower	Capacity of cooling towers, factors affecting the cooling tower capacity	3
		Advantage and disadvantage of different types of cooling towers	
		Cooling tower approach, range, efficiency etc	
		Water treatment, water softening plant	
		Construction and working principles of different	
	Expansion	types of expansion valves such as Thermostatic expansion valves (TXV), Automatic expansion	3
	valve	valves (AXV), Float valve, Electronic expansion	
		valves, Level master control (LMC),Capillary tubes	
		etc	
		Selection of expansion valves	
		Construction and working principles of different	
		types of evaporators	
		Capacity of an evaporator, factors affecting the capacity of an evaporator	
		Types of evaporators such as Natural	
		convention, forced convention, flooded	
	Evaporator	evaporator, Dry expansion evaporator, Bare	2
		tube coil evaporator, Finned tube	
		evaporator, Plate evaporator, Shell and	
		tube, Shell and coil, Tube in tube	
		evaporator, frosting evaporator, non frosting evaporator etc	
		Methods of defrosting such as Manual defrosting,	
		Pressure control defrosting, Temperature control	
		defrosting, Water defrosting, Reverse cycle	
		defrosting, Simple hot gas defrosting, Automatic	
		defrosting, Electric defrosting etc	
		Accumulator	
		Heat exchanger, their function, construction, application & advantage	
		Properties of refrigerant	
		Classification of refrigerants	
		Alternative refrigerants	
	•		

Climatic impact of refrigerants Ozone depletion potential (ODP)				
Refrigerant			Climatic impact of refrigerants

Refrigeration		Capacity & types	
and air	Walk in cooler	Trouble shooting and servicing	
conditioning system	& reach in	Installation method	1
System	cabinet	Care and maintenance of refrigerator	
		Leak testing, Evacuation, Gas charging	
		Function, construction, Working principle	
		Controls & Circuit diagram	
		Capacity & types of cold storage and its details	
		Trouble shooting and servicing	
		Installation method	
		Care and maintenance of refrigerator	
	Cold storage	Methods of Leak testing, Evacuation, Gas charging	3
		Food preservation	
		Maintaining temperature in different places	1
		Properties of commonly used refrigerants like ammonia and its safe handling	
		use of vibration eliminator and shock absorber	
		Mobile refrigeration in transport vehicle	
		Deep freezing, Freezing tunnel, Blast freezing	
		Requirement of comfort Air-Conditioning	

	Psychrometry	Study of psychrometric terms-DBI, WBT, RH, enthalpy, dew point, specific humidity etc Study of psychrometric chart-Dry bulb temperature line, Wet bulb temperature line, Specific humidity or moisture content line, Dew point temperature line, Enthalpy (total heat) line, Vapour pressure line, Relative humidity line etc Study of psychrometric process-Sensible heating, Sensible cooling, Humidification & Dehumidification, Cooling and adiabatic humidification, Cooling and humidification by water injunction, Heating and humidification, Humidification by steam injection, Adiabatic chemical dehumidification etc	4
		Heat load calculation for commercial and industrial buildings	
		Introduction to HVAC	
		Fundamentals of central Air-Conditioning/ HVAC plant	
Module-9		Types of central Air-Conditioning (direct & indirect)	
Commercial		Construction & Working	
Refrigeration and air		Components, Fault, Care & Maintenance	
conditioning		Temperature & pressure control used in AC plant	
system		Construction and working of safety devices in AC plant	
		Cooling tower, Pipe lines	
	Central Air- Conditioning	Preventive maintenance schedule of central Air- Conditioning plant	3
	system/HVAC	Maintain log book for daily operation	J
	plant	Modulating valve for temperature control	
		Package chiller, Screw chiller, Reciprocating chiller	
		Humidity control	
		Humidifier	
		Dehumidifier	
		Air washer	
		AHU, FCU	
		Chilled water system	
		Construction & working principles	
		Types, application	
	Package Air- Conditioner (Air	Installation methods	
	cooled, Water	Trouble shooting	1
	cooled	Care and maintenance	
	condenser)	Temperature & pressure control	
		Construction and working of safety devices	

		Construction & working principles	
		Types, application	
		Study of various electrical & mechanical components	
		Installation methods	
		Trouble shooting	
		Care and maintenance	
	Split package	Temperature & pressure control	1
		Construction and working of safety devices	
		VRV/VRF system	
		Details of piping	
		Common reason for error code	
		Types of ODU & IDU	
		Function, types	
		Classification of ducts	
Module-9		Materials used for ducting	
Commercial		Duct designing	
Refrigeration and air		Pressure in ducts	
conditioning		Duct insulations	
system		Properties of insulation materials	
	Duct	K-factors	4
		Acoustic insulation	
		Air distribution methods	
		Air flow	
		Fan and blower	
		Function, types, classification of fan & blower	
		Static & Velocity pressure measurements	
		Construction, Function of air filters	
		Types of air filters	
	Air Filter	Care & maintenance of air filter	3
		Effect of chocked air filter	
		Clean room	

		Construction, working	
		Study various electrical & mechanical components	
		Testing components	2
		Electrical circuit diagram	
		Fault detection	
	Car Air-	Leak testing, evacuation, gas charging	2
	Conditioner	Installation	
		Trouble shooting	
Module-10		Magnetic clutch operation	
Automobile		Free wheeling	
air-		Care and maintenance	
Conditionin		Study the refrigeration cycle in automobile AC	
g		Construction and working of bus AC	
		Magnetic clutch operation, free wheeling	
	Mobile Air- Conditioner	Refrigerant used HCFC-22, HFC_134a, HFOs, Blends of HFCs, and HFOs	1
	(Bus, Train)	Construction and working of train AC	
		Trouble shooting of Bus AC & Train AC	
		Planning for Preventive maintenance and scheduling	
		Maintenance actives in large AC and Refrigeration plant	

NOTE: - It may be noted that apart from the topics detailed above, questions from other topics prescribed for the educational qualification of the post may also appear in the question paper. There is no undertaking that all the topics above may be covered in the question paper
